

Compact arm

Art.no. 01-700 & 01-706

The Geovent Compact Arm is the ideal extraction solution, when the floor-to-ceiling height is insufficient at the working place, e.g. in welding bays. The Compact Arm has the perfect balance between the suction capacity of larger arms and the easy and trouble-free manoeuvring of smaller arms. - When not in use any longer, it is simply pushed up, taking up only very limited space.

Effective spot extraction
Geovent telescopic Compact arm

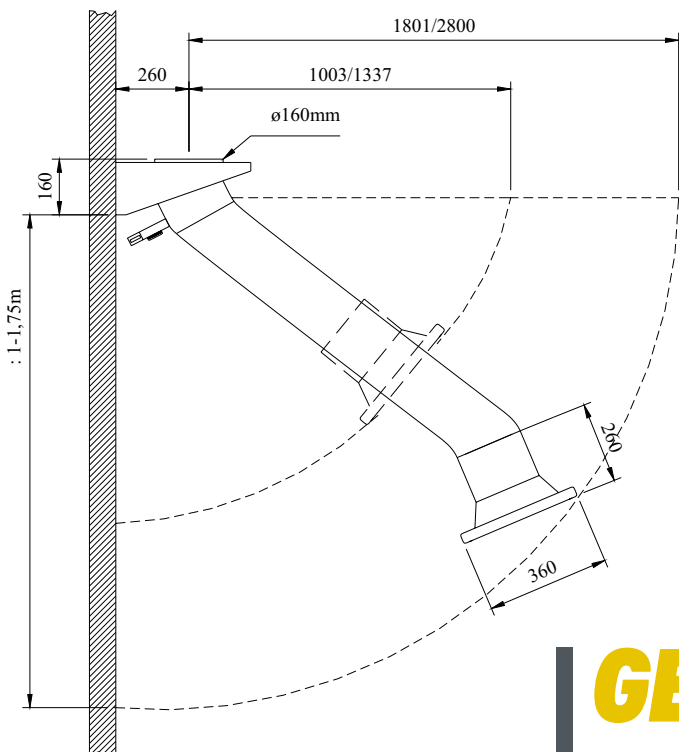

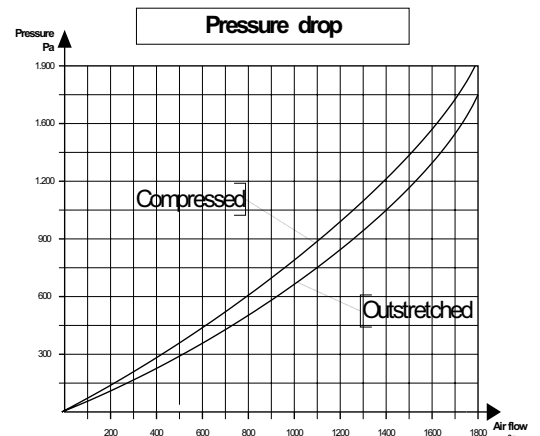

Now also available in 3 meter

5

The arm is mainly used in connection with the welding of smaller units, where neither time nor space allows the use of larger extraction arms without telescope, which could result in loss of productivity.

The arm is supplied factory-assembled and is ready for installation in the ceiling (360° turnable) or on the wall (wall bracket required) together with separate fan or for central systems.

Ordering table	
Art.No.	Model
01-700	Compact Arm ø160 mm telescopic 1- 2 m
01-706	Compact Arm ø160 mm telescopic 1,4 - 3 m
Accessories	
12-008	Damper - tight with rubber ring
01-540	Wall bracket 260 mm off the wall
01-550	Wall bracket 1000 mm off the wall
01-045	Halogen light 50 W with protection net, switch and transformer
01-130	Extension Arm, 2.5 m for the extension of Compact Arm
01-131	Extension Arm, 4.0 m for the extension of Compact Arm
31-209	MSF200 Fan 0.75 kW for direct installation on 01-540 wall bracket
