

# Fan

LSFG/MSFG 146 - 250

GEOVENT centrifugalfan LSFG and MSFG with forward curving impellers is used for extraction within the industry or for comfort ventilation, dependent on the variant. The fan is made of 100% galvanised steel for optimum corrosion resistance and therefore, it is suitable for outdoor installation on the roof or on the wall. It is compatible with Soundbox system 1-2-3.

4

## Effective spot extraction

Geovent full-galvanised fan

Directly driven by a B5 flange motor, sealing class IP 54. The fan may be mounted in three different positions by moving the support feet. The fan can be delivered with a number of options, such as soundproof box, outlet flange, supporting angles with vibration absorbers dimensioned to the individual fan, flex connection, motor protection switch and pressure monitor.

### Ordering table - size 146 - 200

Art.No.	Model	[kW]	[Volt]	[Ampere]
38-001	LSFG 146-3	0,25	3x400	0,81
38-002	MSFG 146-3	0,55	3x400	1,30
38-003	GLSFG 146-3	0,25	3x400	0,81
38-004	GMSFG 146-3	0,55	3x400	1,30
